## How Can We Make a Difference?

More and more people today are recognizing the value of protecting our shared natural environment. Many often ask, "What difference can one person make?" Plenty. The efforts of just one household or business or community can make a big difference in the overall quality of our environment.

The Tennessee Department of Environment and Conservation has launched a program designed to help all Tennesseans do their part for Tennessee's environment.

The Tennessee Pollution Prevention Partnership, or TP3, is a great way for your household, school, government agency, organization, business or industry to learn how to prevent pollution, help protect the environment and save money at the same time!

By preventing pollution before it is produced, the environment is protected, the consumption of our natural resources is slowed, and the amount of waste generated is reduced.

As a member of TP3, you will be part of a growing network of Tennesseans making smart choices to prevent pollution. The Department of Environment and Conservation believes that your actions will improve the quality of life in our homes, workplaces and communities.

## Membership Information

Anyone can be a member of TP3. Households, schools, government agencies, organizations, businesses and industries are all encouraged to participate. This may be the first time you have thought about preventing pollution, or your business may have a well-developed environmental management system in place. No matter what your interest, there is a TP3 membership level to suit your needs and goals:

**Prospect** -- Shows interest in protecting the environment by signing up for TP3.

**Pledge** -- Commits to positive environmental action by taking advantage of simple pollution prevention opportunities.

**Partner** -- Develops a five-project plan, addressing energy conservation, hazardous chemicals, land and water conservation, solid waste reduction and clean air. Completion of one successful project and submission of a Success Story earns Partner status.

**Performer** -- Completes all five projects, submits Success Stories and involves the community in pollution prevention activities. Mentoring other members in the partnership is also a requirement for the Performer level.

## Membership Benefits Include:

Members will receive information on specific ways to practice pollution prevention. Members will be part of our statewide network that will allow them to share ideas and make contacts with like-minded households, schools, government agencies, organizations, businesses and industries.

Members will receive information on upcoming pollution prevention events, seminars and projects. Members will gain priority for limited-seating events.

From these opportunities, members will learn about new ideas on how to prevent pollution, save money and protect our planet.

Each membership level attained will provide the TP3 member with the following material rewards:

**Pledge** - Frameable certificate

**Partner** - Frameable certificate  
TP3 Partner decal

**Performer** - Frameable certificate  
TP3 logo flag
